

TECHNICAL SHEET

LIQUID CLEANER FOR MILK CIRCUITS AND MILK FROTHERS	DC333
<p>PRODUCT DESCRIPTION:</p> <p>SANIMILK is a liquid cleaner specifically designed for cleaning and sanitizing the steam wand (or milk frother) and the milk circuit in all coffee machines. This product features an eco-friendly formula based on highly biodegradable plant-derived surfactants.</p> <p>Available in 1 L and 250 ml sizes.</p>	
<p>INSTRUCTIONS FOR USE</p>	
<p>To clean the steam wand:</p> <ol style="list-style-type: none"> 1. Fill a large pitcher with 25 ml of SANIMILK and 500 ml of cold water. 2. Place the pitcher under the steam wand so that it is submerged in the solution as much as possible. 3. Open and close the steam valve 7–8 times. 4. Empty the pitcher and rinse it thoroughly under running water. 5. Repeat the process using 1 liter of cold water. <p>To clean the machine's built-in milk circuits:</p> <ol style="list-style-type: none"> 1. Remove the milk container and rinse it. 2. Pour in a dose of SANIMILK (25 ml) and fill the container with cold water. 3. Close the container lid and replace it on the machine. 4. Press the hot milk button until the container is empty. 5. Rinse the container, fill it with cold water, and repeat the process. <p>CAUTION: For machines with an automatic system, follow the instructions provided in the machine manual.</p>	
<p>LOGISTICS INFORMATION</p>
